

PROFILE

I have **over 15 years** of clinical experience in various roles in different areas of nursing, with **over 10 years** in medical records review, collecting data and analyzing adherences to or deviations from standards of care in cardiac patients for major hospitals in the country.

My extensive nursing experience, proficiency in medical records review and training as Legal Nurse Consultant enhanced my ability to analyze medical records efficiently and professionally, saving attorneys time & money in developing medical-related cases.

SKILLS

- Proficient in various electronic medical records review and analysis;
- Organize, translate, interpret and summarize medical records;
- Writing reports & chronologies
- Screen cases for merit;
- Identify damages and causation
- Define deviations from, and adherences to, the standards of care;
- Analyze and validate research studies
